- Arabic   - English

PROJECTS

The Wild Oasis 🔗
An internal hotel management system built with *React Query* and *Supabase*, allowing employees to efficiently manage hotel bookings, cabins, and guest information. It streamlines the process of handling reservations and tracking cabin availability.

Kafika Restaurant Website 🔗
A responsive and visually appealing restaurant website built using Next.js and Redux Toolkit. The site showcases the restaurant's offerings, including menu items with detailed descriptions and pricing.

Omnifood Website 🔗
A website for healthy meal subscriptions, designed using *HTML* and *CSS* with some simple *JavaScript* to meet your nutritional needs and personal tastes year-round.

Forkify 🔗
A recipe application designed to help users search for and explore recipes using an API. Built with *HTML* and *CSS* for styling and *JavaScript* for dynamic functionality, including API integration and state management. The project utilizes *Parcel* for bundling and efficient development.

Fast React Pizza 🔗
A pizza ordering application built with *React*, *Tailwind CSS*, and *Redux Toolkit* for state management. It features a dynamic interface for browsing pizza options, adding items to the cart, and managing orders. *React Router* is used for seamless navigation between different views of the app.
